Art Unit: 2614

1. Claims 7-9, 12, and 15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The following is noted:

Page 2

## <u>I</u>. With respect to claim 7:

- a) It is not clear where the disclosure as originally filed defined the relationship between a number of levels "n" into which the luminance level is divided and a number of bits "m" that comprise upper luminance levels. Specifically, it is not clear where the disclosure as originally filed described the recited equation/relationship "n=2<sup>(m-1)</sup>" in term of variable "n" and "m" as is now recited [see lines 5-9 of claim 7];
- b) It is also not clear where the disclosure as originally filed defined "maximum coefficient values" in terms of a variable "x" that ranged from 0 to "n" as is now recited [e.g. lines 20-22 of claim 7].

Application/Control Number: 09/463,642

Art Unit: 2614

More to the point, while the examiner agrees that the specific embodiment of invention shown and described with respect to figure 3 of applicant's originally filed disclosure fall within the scope of the recited equations/relationships of claim 1, the examiner does not believe that the recited equations/relationships are implicit in these figure 3 illustration and description. For example, in the specific embodiment of figure 3 the values of "n" and "m" and "x" are all fixed, not variable, and nowhere in the disclosure is it ever discussed how one of the values should/could change as a function of others. Thus, there is no way from the figure 3 embodiment, as originally filed, for one to determine/derive how one value (e.g. "X") was to have been changed as a function of another value (e.g."n"); i.e. as is now being positively recited via the equations that are recited in claim 7. Clarification is needed.

## II. With respect to claim 12:

Claim 12 requires similar clarifications as set forth above for claim 7.

Art Unit: 2614

2. Claims are objected to because of the following informalities: In the claims, it is not clear as to what the term "maximum" in the label "maximum coefficient values" means/refers [e.g. line 20 of claim 7]. Appropriate correction is required.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
